

Meet Manager Revised Language Preferences Zone, Region And State Championships 2023/2024

Each championship database (Zone, Region and State) has been configured with events, sessions, seeding preferences and report settings for the appropriate carnival. This includes Language Preferences which relate to Keywords and Event Names common to Little Athletics events.

Meet Manager allows the user to change Keywords, Phrases and Event Names to customise a database. This has been done for the Zone, Region and State Championships to reflect the Keywords and Event Names used within Little Athletics. (e.g. Keyword "Team" to "Centre" or Event Name "Dash" to "Sprint")

<u>Each installation of Meet Manager must be individually configured to support the Keywords and Event Names used by Little Athletics.</u>

To make the necessary changes start Meet Manager, go to the Main Menu, and select Set-up, Language Preferences

To amend the Event Names, click on **Event Names** and the following screen will appear. In the "Translate To" column click on the relevant Event Name you wish to change, and the current name will be highlighted. Overtype the current wording with the required event name. Note the "English" column contents do not change. This allows the original wording to be reinstated at any time.

To amend the Keywords, click on **Keywords** and repeat the preceding steps.

The following Keywords and Event Names must be amended to comply with requirements for the Zone, Region and State databases. All Zone, Region and State Meet Manager computers must use these Keywords and Event Names.
